Fedora 12 "Constantine"

Fedora 13 "Goddard"

„Konstantin Tsiolkovsky was a rocket scientist, and so was Robert Goddard"

„You know, it's a funny thing. We go ahead and do things, and afterward, people go and start making history out of it."

— Fred Weick, aircraft designer

„we started with four Fedora ideals”

[we started here.]

Fedora is:

open

free

innovative

forward-looking

„Then we did more research,
and ended up where we began
—with **freedom**”

Fedora's forward-looking nature led us to think about it this way:
Fedora's commitment to the future = a promise ▸ infinite
infinity
innovation
infinite
freedom
openness
infinite innovation
infinite openness
infinite freedom

nedugo zatim

part 1 of 3 [in the creation of the Fedora symbol]

infinite ▸ infinity ▸ ∞ =

part 2 of 3 [in the creation of the Fedora symbol]

"F" ▸ as in **freedom** and **Fedora** ▸ F ▸ f =

lowercase "f" is less corporate

part 3 of 3 [in the creation of the Fedora symbol]

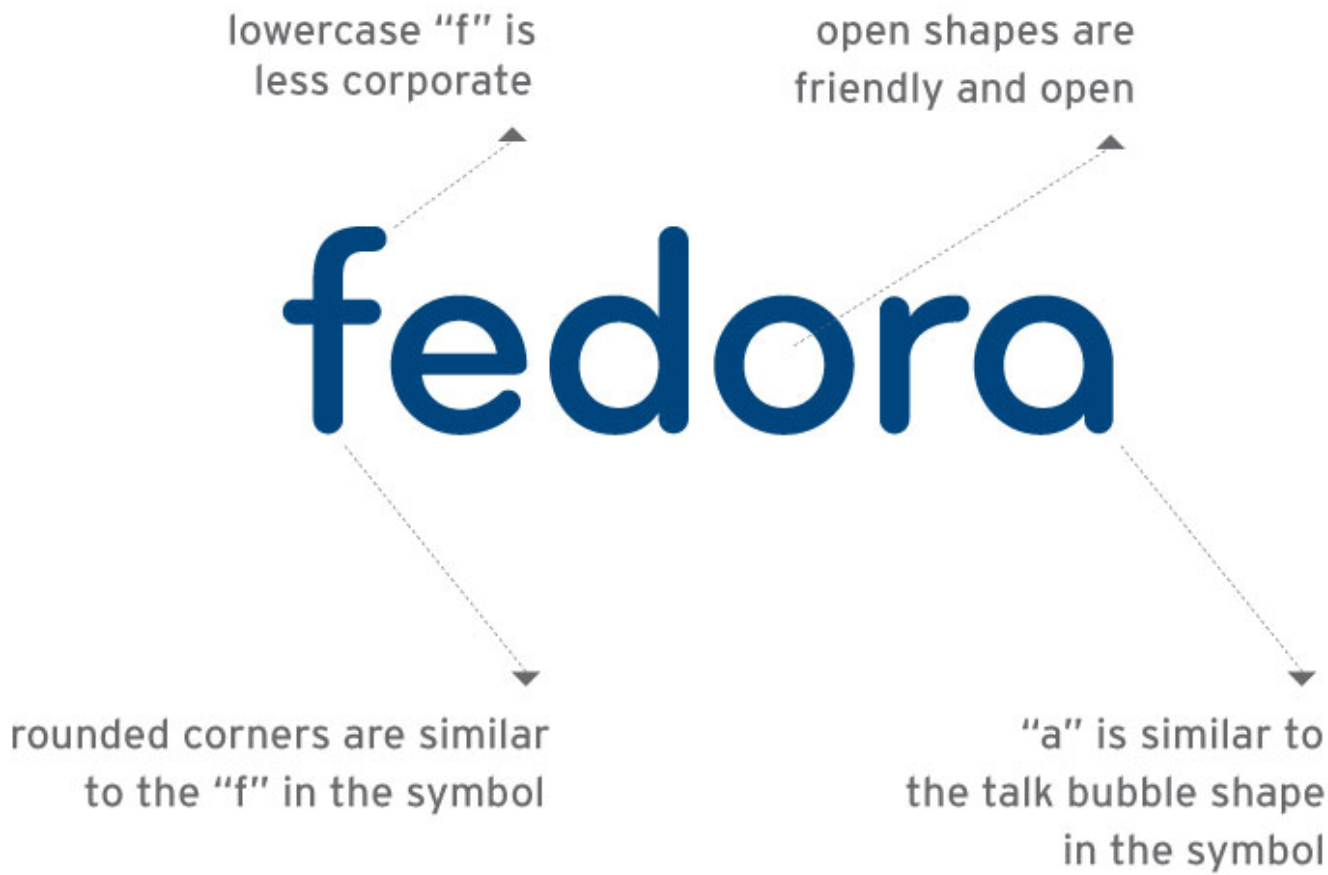
Fedora ▸ the voice of the community ▸ =

the 3 elements [of the Fedora symbol] to combine

infinity freedom voice

the Fedora symbol [with Fedora blue and secondary color]

the Fedora wordmark is structured, friendly, and open
[like the community]



imamo logo, a što sad?

$$\text{Fedora} = \text{Core} + \text{Extras}$$

Fedora Core

$\approx$ Red Hat Linux

Red Hat

Fedora Extras

$\approx$ Fedora Linux

Fedora Community

why the separation?

:-(

4. siječnja 2007.

Bill Nottingham

„It's time to bite the bullet.

There will be no more releases of Fedora Core or Fedora Extras.”

„I'm serious. We've talked all along about how there should be no differences in how packages are treated whether they are in Core, or they are in Extras; no differences depending on who maintains the package.

The best solution to this?

Eliminate the distinction between Core and Extras ***entirely.***

Starting with Fedora 7, there is no more Core, and no more Extras;
there is only Fedora.

One single repository, built in the community on open source tools, assembled into whatever spins the Fedora community desires."

ono što je trebalo biti

Fedora Core 7

je tada postalo

Fedora 7
